# SYNCHROKNOT

## BEYOND LIGHT YEARS WITH SYNCHROKNOT FOR FREE

WOULDN'T IT BE NICE TO USE THE VIRTUAL SYSTEM ON CHIP SOFTWARE FOR FREE FOREVER WITH NO LIMITATIONS?

**YES - SO HERE WE HAVE IT!**

We have reached 100% consensus and we are very happy and look forward to making the Virtual System on Chip free forever with no catches, no vendor lock-ins or traps. The Rocket Fuel mentioned below is not a requirement or a condition for this to happen. The Rocket Fuel would certainly help cover the expenses of 8+ years spent in creating the vSoC from scratch. It will be even more helpful in creating an online self-sustaining and auto-pilot portal where consultants from everywhere in the world can provide engineering, consulting and support, while also having a rating system where the clients and consultants can rate each other.

Also, on an electric note, the Rocket Fuel will also fuel the fast development (within 2 months) of SynchroKnot Light Electric vehicle (a futuristic moon-trekker SUV with 6 wheels, 6ft width 14ft length)

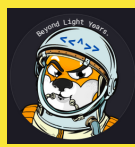

So, what are the next steps?

- 1] Merging the latest, bleeding-edge code into the SynchroKnot base and making it free (without power modules). This will include the removing of the license check mechanism embedded in different parts of the code.
- 2] Making the power modules free after merging the latest, bleeding-edge power module code.
- 3] Completing the design of the self-sustaining portal for engineering, consulting and support for everyone.
- 4] Finishing the full prototype of the SynchroKnot Light Electric ready for production via a SynchroKnot Global Franchise System.

How much Rocket Fuel is needed to be pumped into the Super-Rocket to take us Beyond Light Years?

\$5 - \$10 million USD in Crypto Currency.

Who can contribute towards Rocket Fuel? Anyone. Every cent fills the tank. Contributions can be anonymous or known. We will send you a Thank You note if known and acknowledge you on our contributions page. However, keep in mind, your opinions or suggestions, etc. will not influence the scope and delivery of our software for free.

What are the chances of us being stranded somewhere in time? Very Bleak. Here's why:

Crypto currency cannot be stopped. When the Rocket Fuel is filled, we are going Beyond Light Years, while the others left behind watch, gasping for air!

Where can we contribute?

You can send ETH, SHIB, LEASH or BONE to the existing signed addresses shared before, or please wait for this document and <https://synchroknott.cloud> to be updated with newly-signed addresses.

When are we boarding for Take-Off?

Could be mid February 2022 or before. We are working towards it at a good pace!

**BEYOND LIGHT YEARS. ONBOARDING SOON.**
